

## FLEET MANAGEMENT

# In-house car clubs for staff

Co Wheels provides sustainable fleet management services for companies and the public sector across the UK, specialising in low emission and electric cars.

Your staff don't need to bring their car into work every day just to have access to a vehicle. Using in-house car clubs we can cut travel costs and help you achieve your carbon reduction plan targets.

## ORGANISATIONAL CHALLENGES

- High staff business travel requirements
- High cost of business mileage, taxis, rental & public transport
- Administration and overheads
- GDPR issues storing staff licence and insurance data
- Risk management ensuring employees' cars are safe
- Pressure on parking especially as new Workplace Parking Levies are introduced
- High levels of environmental impact associated with grey fleet

## CO WHEELS SOLUTIONS

- On-line fleet management & telematics booking system
- Reduce costs through a managed corporate scheme with potential income from private use
- Staff and general public can access fleet to ensure maximum use of resources
- Travel options can be integrated with business expenses systems
- Reduce staff parking as no need to bring cars to work
- Minimal management & administration required by organisations
- We can fit our hardware and booking solution to your fleet or provide a full solution

## BENEFITS

- Reduces admin costs  
.....
- Reduces risk & GDPR headaches  
.....
- Reduces commuting by car  
.....
- Reduces car parking requirements  
.....
- Reduces environmental impact  
.....
- Increases active travel

## STAFF USER FEEDBACK

“As a regular bike user I think it’s a great way to get to visits and an alternative to bringing the car to work. The cars are efficient and easy to drive. It allows me to cycle to work which means I beat the traffic, keeps me fit and avoids having to bring the car and find somewhere to park. It saves me also having to complete monthly travel expense forms.

— **Social Worker, Bristol**

‘I think the real bonus with this scheme, is the flexibility in which you can arrange and book transport at any time, night or day and if there are any hiccups, there is a human at the end of the phone so you can get things sorted. My mileage claims for personal transport are now reduced from some 350 miles per month, to about 50 or so and it feels great to be a part of a community trying to keep its carbon footprint to a minimum.

— **Care Coordinator, Bristol**

## CO WHEELS SERVICE
